

Freedom of Information request: Reference number FOI2025/00505

Date of request: 13th May 2025

Request:

Langdon Academy Sussex Road, E6 2PS.

Around 012/14 we had a major leak and some smaller ones in the water mains that runs around the site feeding the fire hydrants, (approx. 2.5 - 3.0 miles would need to be dug up and pipe laid) our manager at the time liaised with a fire officer from East Ham station I believe, it was agreed that it would be noted and an extra pump would be sent.

In our latest fire risk assessment it was raised that we need to have written confirmation that it is acceptable as a long term solution. Would you have a copy of this?

Response:

Further to your request, I have contacted the Fire Safety department and the Control Team for information regarding Langdon Academy Sussex Road, E6 2PS. This location is on LFB records as having to receive a standard fire attendance of two pumping appliances. We have not received any further requests from the local station to enhance this attendance.
