

Freedom of Information request: Reference number FOI2026/00813

Date of request: 13th July 2026

Request:

Back in November 2025, (FOI2025/01334 applies) you kindly answered my request for information on new appliance/vehicle deliveries to the Brigade.

You stated 10 new Renault vans were due for delivery in March 2026, therefore, is it possible to ask for confirmation of their fleet numbers & the fleet numbers of the vehicles they have or are going to replace.

Can I please also ask for confirmation of any appliances or vehicles that have been ordered in the 2025/26 & 2026/27 financial years & when they are due for delivery (or confirmation they have been delivered)

Finally, I note the fleet list currently available on the London Datastore website is dated March 2025; are there plans to update this soon, or will it be updated in early 2027 as per previous years?

Response:

Please see the response below:

You stated 10 new Renault vans were due for delivery in March 2026, therefore, is it possible to ask for confirmation of their fleet numbers & the fleet numbers of the vehicles they have or are going to replace.

At the time of responding, the 10 Renault vans have not yet been delivered. The current estimated delivery date is August 2026. Fleet numbers will be allocated once the vehicles have been received and commissioned into service.

The delivery programme has been affected by a number of outstanding activities, including the completion of vehicle modifications and final commissioning requirements. The Brigade has been working closely with the supplier to resolve these matters and support the earliest possible delivery of the vehicles.

Can I please also ask for confirmation of any appliances or vehicles that have been ordered in the 2025/26 & 2026/27 financial years & when they are due for delivery (or confirmation they have been delivered)

At the time of responding, no new fire appliances have been ordered.

With regard to other vehicles, procurement activity for the 2026/27 programme had reached the tender evaluation stage. Following a minor amendment to the Brigade's requirements, which is expected to deliver improved value for money, the tender documentation was reissued. Revised submissions from tenderers are currently awaited. This has resulted in an estimated procurement delay of approximately four weeks.

LFB is in partnership with manufacturers to progress innovations in electric fire engines.

Finally, I note the fleet list currently available on the London Datastore website is dated March 2025; are there plans to update this soon, or will it be updated in early 2027 as per previous years?

Please see below for the latest copy of the fleet list, which will be published in due course.

We have dealt with your request under the Freedom of Information Act 2000. For more information about this process please see the guidance we publish about making a request on our website: <https://www.london-fire.gov.uk/about-us/transparency/request-information-from-us/>
